GreenIT Case Study: Team UX

From Webflow to Astro: A Journey in Digital Sobriety

Case study from Yuna Orsini, Daniela Peñaranda & Julien Viala

Eco-Design Audit

Impact Assessment

A radical redesign focusing on performance and user needs.

EcoIndex Score
75.34 / 100 (Grade B)

- **Weight:** **145 KB** (Global avg >2MB).
- **Requests:** Only **15 HTTP requests**.
- **Infrastructure:** Hosted on **Infomaniak** (PUE 1.09, natural cooling).
- **Open Source:** Code available under CC BY-NC-ND.

UX & Content Strategy

The low footprint started with design decisions, not just code.

- **Functional Cuts:**
  - No videos or heavy media.
  - No 3rd party scripts (tracking/analytics).
- **Visual Strategy:**
  - **Hidden Images:** Project galleries only load if the user actively clicks to view them.
  - **Reusability:** 4 unique background images are reused across the entire site (rotated/resized) to mimic variety.
  - **CSS Shapes:** Decorative elements drawn in code, not images.

Optimization Highlights

Migrating from Webflow SaaS to a custom Astro stack.

The Font Optimization Journey

How they reduced typography weight by **90%**:

1. Switched to **Satoshi Variable** (Single file vs 3 weights).
2. Converted to **WOFF2**.
3. **Subsetting** via `pyftsubset` (Removed unused glyphs).

Result: 220 KB → 22 KB

- **Images:** Automated AVIF/WebP generation via Astro.
